Environmental questions Did you know...?

SUSTAINABLE SNOW PRODUCTION

... that the term "artificial snow" is not appropriate for snow production? Due to the temporary storage in our reservoirs and as snow on the slopes, the water is only temporarily relocated and returns to 100% into the natural water cycle as meltwater.

RESERVOIR WATER CYCLE

... that no water is used up to make snow? Due to the temporary storage in our reservoirs and as snow on the slopes, the water is only temporarily relocated and returns to 100% into the natural water cycle as meltwater.

EFFICIENT SLOPE PREPARATION

... that the digital snow depth measurement in our snow groomers produces snow exactly where it is needed? As a result, we need less water and can reduce the overall number of snow grooming hours.

BEST LOCAL QUALITY

... that our hosts place great value on hospitality, careful preparation and fresh ingredients? When it comes to products, the focus is on regional, quality and sustainable agriculture.

ENERGY MANAGEMENT

... that 100% of the energy requirements of our lift and snowmaking systems come from green electricity? Our high-performance, state-of-the-art snowmaking system also enables basic snowmaking in the shortest possible time and with the greatest possible energy savings.

PUBLIC TRANSPORT

... that the Gerlitzen Alpe is easily accessible by public transport? You can get to the valley station of the Kanzelbahn by bus or train. That way you can start your day on the slopes in a climate-friendly way, without stress and traffic jams.

RENATURATION AFTER CONSTRUCTION PHASES

... that working in an environmentally friendly way is our highest priority? Areas stressed by construction measures are planted with plants suitable for the location until the renaturation is secured in the long term.
